Index to Articles

Annealing

Annealing considerations for lightweight ware	165	5
Gas infrared lehr for medical/pharmaceutical glassware	169	5
Innovative windscreen annealing process	177	5
Mini lehr concept for float glass	167	5
Proportional, integral and derivative controls	171	5

Annual review

Austrian export drive continues	31	8
Domestic glass overview	303	8
EEC glass container sector report	299	8
Expanding opportunities for architectural laminated glass	310	8
German glass industry is booming	309	8
Glass packaging . . . A growth industry in Spain	315	8
Glass vs cardboard packaging in Finnish milk products industry	321	8
Italian glass industry performance	310	8
Stable Greek demand	312	8
Statutory protection of trademarks in Europe	325	8
Turkish glassmaker in search of new initiatives	317	8
UK glass industry trends	309	8

Batch plant

'Arctic' batch plant on stream	115	4
Automatic batch plant for specialist bottle maker	117	4
Batch plant tailored to crystal maker's production requirements	113	4
In full service	123	4
Fully automatic batch house control	126	4
Pneumatic conveying: Problems and solutions	121	4
Standards hold the key	129	4
Wet sand handling pitfalls avoided	119	4

CAD/CAM

Expanding CAD applications at Corning	179	5
From concept to container . . . The CAD/CAM route	183	5
Powerful design tool enters glass forum	182	5
Proven benefits in factory design	180	5

Combustion efficiency

Flame particle seeding with oxygen enrichment for NO_X reduction and increased efficiency	212	6
Flat-jet oxygen lancing for homogeneous melt	217	6
Gas heating value stabilisation	215	6
Lower temperature recuperative burner system	210	6
Low sulphur dilemma, The	205	6
Success in all oxy-fuel glass melting, A	209	6
What price combustion control for the smaller glassmaker?	219	6
Where do I go from here?	203	6

Company profile

Harworth's lighting specialisation	161	5
Maintaining centuries of tradition	461	11
Marketing integration	159	4
Not customers . . . Rather co-manufacturers	371	9
Positive results from British Glass	111	4
Reaping the benefits of small series production	245	7
Selling technology to the world	163	5
Study in individuality, A	100	3
There's more to GB than bulbs	155	5
Toughening up with printing innovation	447	10
Versatile role for Lemington	163	5
$7 million tableware expansion at Chesterfield	156	5

Conference report

Energy efficiency — time is running out	56	2
European glassmakers discuss the fundamentals	518	12
Standardisation and training top quality agenda	333	8
Waterford hosts European crystal convention	339	8

Decoration

Czechoslovakia's artistic inheritance	285	7
Exhibitors in focus	273	7
European initiative to promote screenprinting	135	4
Flexibility answers decorators' needs	141	4
Glass etching: Attitudes compared	277	7
Heavy metal release testing	31	1
Lead-free materials announced	32	1
Meeting of minds: Retail to manufacturer	143	4
Operating characteristics of a modern decorating lehr	137	4
Revolution in printing techniques	133	4
Screenprinting for flat glass	281	7
SGCD seminar to focus on industry issues	269	7
Time and money cut by 70% with diamond grinding tools	275	7
Waste water neutralisation in glass frosting	279	7

Exhibition news

South East Asian experience	231	6
Striking the balance: Promotion and discussion	343	8

Focus on flat

Adventure in glass, An	328	8

Forehearth colouring

Savings by forehearth colouring	145	4

Forming

Automatic press developments	55	2
Container forming technology: Past trends and future outlook	53	2
Electronic press-blow machine completes tableware trials	47	2
Guide to forming machinery spares and rebuild/repair services	257	7
Planning ahead for reduced downtime	253	7
Raising productivity through automation	484	11
Tailor-made for high volume duties	43	2

Furnace heat-up

Heat-up contractors in focus	11	1
Heat-up/cool down operations	7	1

Glass design

Imagination . . . With a hint of realism	400	9

Glassfibre production

Advice for the glassfibre worker	390	9
First fluorine-free fibres	34	1

Glass in transit

On the road for just-in-time delivery	444	10
Pilkington approach, The	443	10
Teamwork relieves the complexities of glass container delivery	440	10
Transport breakages minimised	444	10

Handling/packing

Aiming for zero-error order preparation	396	9
Automatic packing for glass tubing	392	9
Decade of growing complexity, A	387	9
Remote control crane for Pilkington	394	9

Insulated glazing

Automotive double glazing innovation	228	6
Milestones in a decade of change	223	6

Laminated glass

Architectural uses explored	95	3
Creativity in practice	91	3
Flexibility with automation for the windscreen maker	488	11

Lighting glass

Fluorescent tube inspection	189	5
Halogen's a winner	187	5
Lighting market's fair game	250	7
Shades of traditional French craftsmanship	187	5

Melting technology

Advantages and disadvantages of cullet in glass manufacture	29	1
Continuous melting, discontinuous working	418	10
Cost benefits awaiting the bottle maker	430	10
Metallic recuperator and regenerator designs compared	415	10
Pot furnaces with regenerative burners	433	10
Pyrex world first	425	10
Roof design to tackle 'tin drip'	472	11
Small revolution in furnace design	423	10
Thermal insulation of silica crowns	28	1
Troubles with the firing system	473	11
Using a water-cooled endoscope for furnace inspection	428	10
View from the dragon's mouth!	437	10

Moulds

Glassmaker's approach to mould manufacture	465	11
Good lubrication practices in the forming area	469	11

Plant utilities

Forgotten variable, The	487	11
Is your compressed air really clean and dry enough?	231	6

Process control

Expanding control and analysis needs of the glass industry	63	2
Fully automatic batch plant control	99	3
More advanced control for smaller operations	61	2
Process control technology for container manufacture	66	2

Processing

Automotive glass cutting and breaking technology	26	1
'Brilliant' acid-free holloware processing	24	1
But first . . . Let's talk!	20	1
Cleaning the coolant circuit	15	1
Core drilling parameters	20	1
Cutting heat the IR way	34	1
Czech approach to final finish	23	1
Polishing powders investment	17	1
Quick change processing for thick-walled articles	19	1
Sealed unit manufacturer opts for automated cutting	25	1
Two headed drilling machine, The	27	1

Quality control

All in one bottle quality control	144	4
Automatic inspection of tumblers	77	3
Base inspector speeds empty container processing	83	3
Fundamentals of machine vision inspection	88	3
Glassmaker's assessment of a base inspection system	514	12
Laser-based float glass examination	81	3
Quality assurance systems help producers meet challenging market requirements	85	3
Quality control seminars for 1991	68	2

Raw materials

B_2O_3 in container glass	500	12
Calumite slag: Benefits from another recycled material?	511	12
Soda ash scene	505	12
UK raw materials review	499	12

Safety glazings

Aspects of toughening	381	9
Bending and toughening flexibility	375	9
Crossing the architectural spectrum	379	9
Enhanced quality, control and efficiency claims	370	9
Gauging a precise market niche	380	9

Sealing glasses

Using glass as a sealant	489	11

Sodium silicate

Many faces of sodium silicate, The	191	5

Surface technology

Cold end surface treatment	475	11
Ensuring optimal bottle design	480	11
Oleochemicals in the processing of glass	481	11
On-line surface treatments improve glass performance	477	11
Toxic emissions control	479	11

Training

Employee involvement essential	522	12
European training round-up	526	12

OVERSEAS ADVERTISEMENT REPRESENTATIVES FOR GLASS

Sole advertisement representative for France and Belgium:
Sirocco
85 Rue de la Verrerie,
75004 Paris, France.
